**Problem Solving 1**

Write the phrase 'I love QGIS Python Programming' in several text files into a folder with each file containing line counts of the phrase equivalent to the file number.

That is:-
"file_1.txt" would have one line of the phrase,
"file_2.txt" would have two lines of the phrase,
 "file_3.txt" would have three lines of the phrase,
"file_4.txt" would have four lines of the phrase, etc

Exercise 1:

Read each text file and its corresponding file size into a dictionary?
